

Service Pack 1

Modules

Availability and role settings, as well as custom layouts for modules and tabs, are preserved upon upgrade. The following user defined settings are preserved:

- Tabs
- Tab Groups
- Modules
- Tab Modules – default layouts
- Tab Modules – user layouts

Administrators have the ability to fix modules to the top row of a page, ensuring high-priority modules will always appear in the desired location. Fixed modules cannot be moved or deleted by users, even on user-customizable tabs.

Administrators can control the availability of modules by date and time, allowing for time sensitive content to be scheduled for release, removing the need to set availability manually.

My Organizations Module

The My Organizations module now has all the same customization features as the My Courses module.

Users have the ability to re-order their courses or organizations in the My Courses and My Organizations modules, adding another level of personalization to the modules.

Notifications

Notifications are now processed in priority order. For example, Due or Past Due notifications are sent before the thousands of "new content" notifications. The priority of a notification is determined internally based on factors such as due date and message type.

RSS Support

Blackboard Learn now supports updated RSS infrastructure including support for contemporary, as well as legacy syndication formats including RSS 1.0, RSS 2.0, Atom 0.3, and Atom 1.0.

User Identification and Avatars

When logged in, users now have a visual indicator that displays their name and avatar if avatars are available in the system.

Service Pack 2

Modules

Users can browse and search for modules to add to their My Institution Page and Notifications Dashboard.
