

Blackboard 9.1 SP1-SP5 – Content Management Features

Service Pack 1

Navigation and Shortcuts

The Shortcut View takes up less space vertically to reduce scrolling. A Bookmark link has been added for immediate access to bookmarks. Jump To... and Search Content have also been added to the left side for consistency and improved access.

Breadcrumb Navigation uses the separator between folders as an active button to open a dropdown menu. Items in the drop-down include all the folder's associated subfolders, making navigation in the folder hierarchy much faster. The Content Collection breadcrumb brings users to the "top" folder where they can select any of the content areas.

The current folder name is not displayed in the title with the content area name, and basic operations such as edit, set permissions, and bookmark can be performed from a contextual menu on the current folder.

Sharing Content using Email

When emailing content to users has the To, CC, and BCC labels are now buttons that allow selecting individual users, courses or organizations, a group, or roles within the course or organization.

The system will now check that recipients have access to the emailed files or folders. Users will be warned if recipients do not have access to read the files. If recipients do not have access to read the files, the system can automatically set read permissions after confirmation with the user.

WebDAV

Instructions for setting up and using WebDAV have been improved to be clearer and give specific operating system instructions where possible. Automatic Web Folder opening has been restored for Windows Internet Explorer on Windows XP and Windows Vista with SSL (HTTPS). Users may have to re-authenticate in the Web Folder client. Users with Windows 7 cannot open Web Folders due to a Microsoft bug. Users that are not connecting with SSL have instructions provided in the user interface.
